This meeting was a combination of Zoom and in person.

The meeting centered around the objectives of the Plan. Both short and long term. We looked at the configuration of the new community and possible paths that development may take place in the future that will bring us together geographically.

We also looked at the need for higher density living areas, as well as issues with public transportation. Both of which impact growth in the community.

Following the meeting Tina sent out information from questions brought up in the meeting regarding the mandate and the scope of the committee and Council in the process.

The next meeting is February 29, 6:30 pm. Hanwell Place.
