WATER SUPPLY DISRUPTION

WATER SHUT OFF + BOIL WATER ADVISORY

Date: **September 3rd, 2024**

To: All Residents of Birchwood Estates

A planned power outage by NB Power has been scheduled for the morning of **September 3rd, 2024**

This maintenance effort requires temporarily shutting off power to your drinking water supply. As such, the disruption to your water supply may take up to 4 hours, **from about 7:30 am to 11:30 am.**

When your water supply is restored, you are further advised that all water used for consumption, i.e. drinking, preparing food, hot and cold beverages, ice cubes, for washing fruits and vegetables and for dental hygiene, **MUST BE BOILED.**

You are advised to hold water at a rolling boil for 1-minute. Water may be boiled in a heat resistant container on a stove, in an electric kettle or in a microwave oven (use a glass rod or wooden or plastic stir stick in the container) then allowed to cool or refrigerated until needed.

Boiling tap water for other household purposes, such as bathing, showering, laundry or washing dishes is **not required.** Hands may continue to be washed using tap water and a proper hand washing technique that includes using soap for a minimum of 20 seconds.

Boil Water Advisories are issued as precautionary measures on behalf the New Brunswick Department of Public Health and **will remain in effect until notified otherwise.**

We apologize for the inconvenience, but your health is of utmost importance and your cooperation is appreciated.

Thank you,

Naveed A. Majid, P.Eng
