BOIL WATER ADVISORY
RESCINDED

EFFECTIVE IMMEDIATELY

To: Birchwood Estates Residents

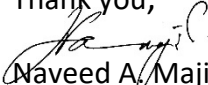

Your water is once again safe to drink.

Thank you for your patience and your cooperation during this major inconvenience. You are no longer advised to boil water before consumption.

A maintenance procedure performed Wednesday February 5th at the water treatment facility required the release of pressure from the water distribution system. A depressurized distribution system pipe network has the potential to allow bacteria to enter pipes.

The Boil Water Advisory was a precautionary measure issued by the NB Dept. of Health because your health is of the utmost importance.

If you have comments, concerns or questions about your water and/or water treatment system, please use the information provided on the side-panel to contact Freelance Environmental, anytime.

Thank you,

Naveed A. Majid, P.Eng
